Description

The Sanwa RX-380 3-Channel Receiver is the most affordable FH3 receiver from Sanwa! Compatible with the MT-S, MT-4, MT-4S, M12, and M12S transmitters - this receiver is small, lightweight, affordable and high-voltage compatible! This is a non-telemetry receiver that is not equipped with BEC Circuitry and requires a voltage regulator or ESC with BEC to lower the voltage to the receiver.

Specifications:

Frequency: 2.4GHz FH3

Input "Nominal" Voltage: 4.8v - 7.4v (High Voltage!)

Weight: 8g

Dimensions: 37.5 x 24.7 x 14.11 mm

Fail Safe Limit: 3.8v Default/ 3.5v - 5.0v Adjustable

WARNING! The receiver is NOT equipped with BEC circuitry. DO NOT use a receiver battery greater than 7.4 volts to power the receiver. Use only a 4.8 to 7.4 volt receiver battery, an ESC with a BEC circuit that lowers the voltage to the receiver, or a voltage regulator that lowers the voltage to the receiver.
